The diagram illustrates three different ways to represent the number 12 using rectangular blocks:

- Row 1:** A group of 9 blocks followed by a gap and a group of 4 blocks. This represents the equation $9 + 4 = 13$, which is incorrect for the target number.
- Row 2:** A group of 7 blocks followed by a gap and a group of 5 blocks. This represents the equation $7 + 5 = 12$.
- Row 3:** A group of 8 blocks followed by a gap and a group of 4 blocks. This represents the equation $8 + 4 = 12$.
