

The diagram illustrates the hierarchical structure of a 128-bit block cipher. It is organized into four rows of blocks, with each row representing a different level of the hierarchy. The top row consists of four groups of 8 blocks each, totaling 32 blocks. The second row consists of four groups of 8 blocks each, totaling 32 blocks. The third row consists of four groups of 4 blocks each, totaling 16 blocks. The bottom row consists of a single group of 3 blocks.
