A horizontal row of ten sets of vertical bars. Each set contains four bars of increasing height from left to right, representing a step function or a series of discrete steps.

The image shows four distinct horizontal rows of ten empty rectangular boxes each. These boxes are intended for children to draw or label, possibly representing groups of ten objects. The rows are evenly spaced and aligned horizontally across the page.

The image consists of three separate horizontal rows of five empty rectangular boxes. Each box is white with a thin black border. The first row has five boxes, the second row has three boxes, and the third row has five boxes.

The diagram consists of two rows of rectangles. The top row contains four groups of three rectangles. The bottom row contains two groups of five rectangles. This visual representation corresponds to the multiplication problem 4 x 3 = 12 and 2 x 5 = 10.

The diagram consists of three horizontal rows of rectangular boxes. The top two rows each have 10 boxes, while the bottom row has 8 boxes, with the last two positions being empty.

The image consists of two identical horizontal rows of ten empty rectangular boxes. Each box is defined by a black double-line border. The boxes are evenly spaced and extend across the width of the image.

The image displays a sequence of binary digits (0s and 1s) arranged in three horizontal rows. The top row contains 10 digits, the middle row contains 9 digits, and the bottom row contains 11 digits. Each digit is represented by a vertical bar of a specific height: a short bar represents a '0' and a tall bar represents a '1'. The sequence starts with a '1' in the first position of each row and continues with alternating '0's and '1's.
