Също така, това едно и също е възможно да се използва за  
помагане на хората със слабо зрение - чрез това, че  
всички съвети са във вид на звукови  
команди, които са лесни за разбиране.  
Използвайки този метод, хората със слабо  
зрение могат да използват компютърите  
и да получават информация от тях.  
Така, тези, които са ограничени  
във възможността да видят, са способни  
да използват компютърите.
