

The diagram consists of two horizontal rows of rectangular boxes. The top row contains four distinct groups, each consisting of five adjacent boxes, for a total of 20 boxes. There are spaces between these groups. The bottom row contains three distinct groups of adjacent boxes: the first group has seven boxes, followed by a space, then a second group of seven boxes, followed by a space, and finally a third group of seven boxes. This visualizes the addition of 20 and 21.
