The image displays a binary sequence across three horizontal rows. The first row contains 10 binary digits (bits). The second row contains 7 bits. The third row contains 10 bits. Each bit is represented by a vertical bar of a specific height, where a height of 1 unit indicates a '0' and a height of 2 units indicates a '1'. The sequence starts with a '1' in the first row, followed by '0', '1', '0', '1', '0', '1', '0', '1', '0' in that order. The second row starts with a '0' and ends with a '1'. The third row starts with a '1' and ends with a '0'.
