

The diagram consists of three horizontal rows of rectangular boxes, each box representing a unit of data or memory.

- Row 1:** Contains two groups of five boxes each, separated by a larger gap. The first group has five boxes, followed by a gap equivalent to one-and-a-half groups of five boxes, and then another group of five boxes.
- Row 2:** Contains four groups of boxes. From left to right: a group of four boxes, a group of seven boxes, a group of two boxes, and a group of five boxes. There are gaps between these groups: a gap of two boxes after the first group, a gap of one box after the second group, and a gap of one box after the third group.
- Row 3:** Contains a single continuous row of seven boxes.
