The image shows a 4x4 grid of rectangles. Each rectangle is divided into four quadrants by a horizontal and vertical line. The rectangles are arranged in four rows and four columns. The patterns of shading and line thicknesses are as follows:

- Row 1:**
  - Column 1: Thin lines, top-left shaded.
  - Column 2: Thin lines, top-right shaded.
  - Column 3: Thin lines, bottom-left shaded.
  - Column 4: Thin lines, bottom-right shaded.
- Row 2:**
  - Column 1: Thick lines, top-left shaded.
  - Column 2: Thick lines, top-right shaded.
  - Column 3: Thick lines, bottom-left shaded.
  - Column 4: Thick lines, bottom-right shaded.
- Row 3:**
  - Column 1: Thin lines, top-left shaded.
  - Column 2: Thin lines, top-right shaded.
  - Column 3: Thin lines, bottom-left shaded.
  - Column 4: Thin lines, bottom-right shaded.
- Row 4:**
  - Column 1: Thick lines, top-left shaded.
  - Column 2: Thick lines, top-right shaded.
  - Column 3: Thick lines, bottom-left shaded.
  - Column 4: Thick lines, bottom-right shaded.

[illegible]

The diagram illustrates the decomposition of a 16-bit integer into four 4-bit segments. The top row shows the 16-bit integer as a single block, which is then split into four 4-bit segments. The bottom row shows the four 4-bit segments as individual blocks.
