

A diagram illustrating the number 100. It consists of four rows of small squares. The first row has 10 squares, the second row has 10 squares, the third row has 10 squares, and the fourth row has 10 squares. This represents 4 groups of 10, totaling 40 squares. However, the text indicates this represents 100, suggesting each square might represent 2.5 units, or there is a discrepancy in the visual representation.
