The diagram illustrates the number 100 using 100 small squares. The squares are arranged in four rows, with 25 squares in each row. The first row has 10 squares on the left and 15 on the right. The second row has 20 squares on the left and 5 on the right. The third row has 15 squares on the left and 10 on the right. The fourth row has 5 squares on the left and 20 on the right. This arrangement visually represents the number 100 as a sum of four groups of 10.
