

The diagram illustrates two subtraction problems using four-digit numbers. The first problem, at the top, shows 4321 minus 1234, resulting in 3087. The second problem, at the bottom, shows 4321 minus 1235, resulting in 3086. Each number is represented by a horizontal line divided into four segments, corresponding to the thousands, hundreds, tens, and ones places.
