The image consists of a series of 17 empty rectangular boxes arranged horizontally. The first group contains 10 boxes. Following this are three separate groups, each containing 4 boxes. These boxes are likely intended for labeling or marking specific points in a sequence.

The image displays a visual model for division. On the left, there are 12 empty rectangles arranged in two rows of six. A vertical colon (:) is positioned between the first two rows and the second two rows. To the right of the colon, there are two more rows of empty rectangles, each containing four rectangles. This illustrates that 12 rectangles are being divided into 3 equal groups, with each group containing 4 rectangles.
