The diagram illustrates a sequence of binary digits (bits) arranged horizontally. The bits are represented by small squares, some of which are highlighted in blue. Blue horizontal bars are drawn above certain groups of bits to indicate specific bit positions or fields. The sequence starts with a group of four bits (0000), followed by a group of five bits (00000) with a blue bar above the fourth and fifth bits. This is followed by a group of six bits (000000) with a blue bar above the fourth, fifth, and sixth bits. Another group of four bits (0000) follows, with a blue bar above the second, third, and fourth bits. Then there is a group of five bits (00000) with a blue bar above the first, second, third, fourth, and fifth bits. Finally, there is a group of four bits (0000) with a blue bar above the second, third, and fourth bits.
