Сърдечните болести са едни от най-честите

заболявания в света. Техните симптоми са различни и съвсем не са същите за всички болести, като например - възпаление на сърдечните тъкани, болести на

сърдечните съдове и т.н. Също така, болестта може да има и сърдечни симптоми

и да е предизвикана от други болести, като например хипертония, хипотония, хипертиреоидизъм и т.н. Тези състояния са също сърдечни болести

и трябва да се внимателно наблюдават и да се избегнат.
