Следует отметить, что введение в практику генетической инженерии в сельском хозяйстве неизбежно приведет к тому, что в будущем мы будем иметь дело с новыми видами сельскохозяйственных культур, созданными путем генетического манипулирования. Это может привести к ряду проблем, связанных с безопасностью и этикой генетической инженерии. Поэтому необходимо проводить тщательный анализ и оценку рисков, связанных с использованием генетической инженерии в сельском хозяйстве, и принимать соответствующие меры по их минимизации.
