1. **Introduction**
 This document is a technical specification for a software system. It describes the system's architecture, components, and interfaces. The purpose of this document is to provide a clear and concise description of the system for developers and users.

2. **System Architecture**
 The system is designed to be modular and scalable. It consists of several components that interact with each other. The architecture is based on a client-server model.

3. **Components**
 The system is composed of the following components:
 - **Client:** The client is responsible for sending requests to the server and receiving responses.

- **Server:** The server is responsible for processing requests and returning responses.

- **Database:** The database is used to store and retrieve data.

- **API:** The API is used to communicate between the client and the server.

4. **Conclusion**
 This document provides a detailed description of the system's architecture and components. It is intended to be used as a reference for developers and users.
