A horizontal row of 20 empty rectangular boxes, each with a black border, intended for children to write their names in. The boxes are evenly spaced and extend across the width of the page.

The diagram consists of three rows of rectangles. The top row has 10 rectangles. The middle row has 5 rectangles. The bottom row has 10 rectangles. The first two rectangles in the top row are grouped together. The next two in the top row are grouped together. The last two in the top row are grouped together. The first two rectangles in the middle row are grouped together. The next two in the middle row are grouped together. The last two in the middle row are grouped together. The first two rectangles in the bottom row are grouped together. The next two in the bottom row are grouped together. The last two in the bottom row are grouped together. This illustrates the concept of grouping in multiplication, where the total number of rectangles is 30, but they are organized into 15 groups of 2.

Four sets of five empty rectangular boxes each, arranged horizontally. This visual representation is used to show the structure of the multiplication table for 5.
