Disability is not a condition, it is a process. It is the result of the interaction between an individual's physical, mental, or intellectual condition and the barriers in their environment. Disability is not a permanent state, it is a dynamic process that can change over time.

Disability is not a condition, it is a process. It is the result of the interaction between an individual's physical, mental, or intellectual condition and the barriers in their environment. Disability is not a permanent state, it is a dynamic process that can change over time.

Disability is not a condition, it is a process.
