

Question: How many people are there in the world?

Answer: There are approximately 7.8 billion people in the world as of 2023. The population is growing rapidly, with an estimated increase of about 1 billion people every 12 years. The distribution is uneven, with high concentrations in Asia and Europe, and lower densities in Africa and South America. Projections suggest the population will reach nearly 10 billion by 2050.

Question: What is the capital of France?

Answer: The capital of France is Paris. It is a city of over 2 million people, known for its art, fashion, and history. Other major cities in France include Marseille, Lyon, and Toulouse. Paris is also a global hub for finance, culture, and tourism.

Question: How many continents are there?

Answer: There are seven continents: Africa, Asia, Europe, North America, South America, Australia, and Antarctica. Each continent has its own unique geographical features, climate, and cultural heritage. Antarctica is the only continent without a permanent population.

Question: What is the largest country in the world?
