

It is the policy of the Department of Health and Human Services (HHS) to ensure that all information collected by the agency is accurate, reliable, and of high quality. To this end, HHS has established a system of internal controls designed to ensure the integrity of the information. These controls include a variety of procedures, including the use of data validation techniques, the implementation of quality assurance programs, and the establishment of a system of internal audits. The Department is committed to ensuring that the information it collects is of the highest quality and is used to improve the health of the American people.

Internal controls are an essential part of any organization's system of internal management. They are designed to ensure that the organization's resources are used efficiently and effectively, and that the organization's information is accurate and reliable. Internal controls can help to identify and prevent errors, fraud, and other problems. They can also help to ensure that the organization is complying with applicable laws and regulations. The Department of Health and Human Services has a strong commitment to internal controls, and we will continue to work to improve our system of internal management.
