

Information Security Policy

Information Security

The purpose of this policy is to ensure the confidentiality, integrity, and availability of information assets.

This policy applies to all information assets owned or controlled by the organization, including physical and digital assets.

The organization shall implement appropriate security measures to protect information assets from unauthorized access, disclosure, modification, or destruction.

The organization shall conduct regular security audits and risk assessments to ensure the effectiveness of its security measures.

This policy shall be reviewed and updated as necessary to reflect changes in the organization's information assets and security requirements.

The organization shall ensure that all employees and contractors are aware of and understand the information security policy and their responsibilities for protecting information assets.

Information Security - Confidentiality
