

“—”

“—” is a symbol used in various contexts, often representing a range or a specific value. In mathematics, it can denote a range of numbers or a specific point on a number line. In programming, it is used to represent a range of indices or a specific character. In linguistics, it can represent a range of sounds or a specific phonetic feature. The symbol is also used in various other fields, such as music and art, to represent specific concepts or values.

The symbol “—” is a horizontal line, which is a common shape in many different contexts. It is often used to represent a range or a specific value, as mentioned in the previous paragraph. The symbol is also used in various other fields, such as music and art, to represent specific concepts or values.
