

# THE UNIVERSITY OF CHICAGO PH.D. PROGRAM IN CHEMISTRY

The University of Chicago is pleased to announce that the Department of Chemistry is currently accepting applications for Ph.D. students in Chemistry. We are seeking outstanding students who are interested in research in the field of Chemistry. For more information, please contact the Graduate Program Director at 773-837-3284 or visit our website at [www.chem.uchicago.edu/graduate](http://www.chem.uchicago.edu/graduate).

Applications should be submitted to the Graduate Program Director, Department of Chemistry, 5721 S. Woodlawn Avenue, Chicago, IL 60637. The deadline for applications is January 15, 2024. Please note that the deadline for international applicants is October 15, 2023.

Applicants must submit a curriculum vitae, a statement of purpose, and three letters of recommendation. A minimum GRE score of 320 (30 on verbal, 160 on quantitative) is required for international applicants. For more information, please contact the Graduate Program Director at 773-837-3284 or visit our website at [www.chem.uchicago.edu/graduate](http://www.chem.uchicago.edu/graduate).

The University of Chicago is an Equal Opportunity Institution. We are committed to creating a diverse and inclusive environment for all members of our community. We encourage applications from individuals of all backgrounds, including women, minorities, and LGBTQ+ individuals. For more information, please contact the Graduate Program Director at 773-837-3284 or visit our website at [www.chem.uchicago.edu/graduate](http://www.chem.uchicago.edu/graduate).

Q: How do I know if my system is infected with malware?  
A: There are several signs that indicate a system might be infected with malware. These include: unexpected system slowdowns, frequent crashes or freezes, unusual network activity, pop-up ads, and changes to browser settings without your consent. If you notice any of these symptoms, it's important to take immediate action to scan and clean your system.

Q: What should I do if I suspect I have malware?  
A: If you suspect your system is infected, follow these steps: 1. Disconnect from the internet to prevent further damage or data theft. 2. Boot into safe mode to prevent the malware from running. 3. Run a full system scan using a reputable antivirus or anti-malware software. 4. Remove any detected threats. 5. Update your operating system and security software to the latest versions. 6. Consider restoring your system from a clean backup if the infection persists.

Q: How can I prevent malware infections?  
A: There are several ways to prevent malware infections: 1. Keep your operating system and software up to date with the latest security patches. 2. Use a reputable antivirus or anti-malware software and keep it updated. 3. Avoid downloading files from untrusted sources or clicking on suspicious links. 4. Be cautious of phishing emails and social engineering attacks. 5. Use strong, unique passwords for all accounts. 6. Regularly back up your data to a secure location.

---

## Q: How can I protect my data?

A: Protecting your data is crucial for maintaining privacy and security. Here are some key strategies: 1. Use encryption for sensitive files and communications. 2. Enable two-factor authentication (2FA) for all accounts. 3. Regularly back up your data to a secure, off-site location. 4. Use secure, encrypted connections (HTTPS) for online transactions. 5. Be vigilant about phishing and social engineering attempts. 6. Limit the amount of personal information you share online. 7. Use secure email providers and avoid using public Wi-Fi for sensitive activities. 8. Consider using a privacy-focused browser and search engine.

Q: What are some common security myths?  
A: There are several common security myths that can lead to false confidence and increased risk. These include: 1. "I'm not a target" - Everyone is a potential target. 2. "My system is secure" - No system is completely secure. 3. "I don't need antivirus" - Antivirus software is essential for protection. 4. "I can't be hacked" - Hackers are always looking for vulnerabilities. 5. "I don't need updates" - Updates are critical for security. 6. "I can't be scammed" - Scams are everywhere. 7. "I don't need a password" - Passwords are the first line of defense. 8. "I don't need a firewall" - Firewalls are essential for network security.
