

UNEMPLOYMENT (OR JOBLESSNESS) OCCURS WHEN PEOPLE ARE WITHOUT WORK AND ACTIVELY SEEKING WORK.

(Definition: Unemployment; Unemployed persons; Unemployment rate; Unemployment rate; Unemployment rate; Unemployment rate; Unemployment rate; Unemployment rate; Unemployment rate)

Unemployment: Unemployment is the condition of being out of work and actively seeking work. It is a state of being without a job, but with the ability and willingness to accept one. Unemployment is a social and economic issue that affects individuals and communities. It is caused by a variety of factors, including economic downturns, technological changes, and demographic shifts. Unemployment can lead to financial hardship, loss of self-esteem, and social isolation. It is a complex issue that requires a multi-faceted approach to address.

Unemployment rate: The unemployment rate is the percentage of the labor force that is unemployed and actively seeking work. It is calculated by dividing the number of unemployed persons by the total labor force and multiplying by 100. The unemployment rate is a key indicator of the health of the economy. A high unemployment rate indicates a weak economy, while a low unemployment rate indicates a strong economy. The unemployment rate is influenced by a variety of factors, including economic growth, technological changes, and demographic shifts. The Bureau of Labor Statistics (BLS) reports the unemployment rate on a monthly basis. The unemployment rate has fluctuated significantly over the past few decades, with a notable increase during the 2008-2009 financial crisis.
